RE: BA in Public Policy

---

The Department of Human Development and Family Studies fully endorses the SUAPP newly proposed major, Public Policy. We believe this will provide an important educational opportunity for students at the University of Delaware. Also, several of the courses will be of particular interest to our Human Services majors. We believe that the HDFS courses that you have included as possible electives are very appropriate, along with the inclusion of our proposed Minor in Human Development and Family Studies. We wish you the best with this new initiative.
